

**PRESS RELEASE**

***All-in-one device for accepting payment cards and a fiscal register - Banca Intesa solution for businesses***

**Beograd, 3 April, 2022** – Since it has been a market leader in the sphere of payment cards for over a decade and a half, ahead of the e-fiscalisation reform, Banca Intesa developed an innovative solution for businesses - an integrated “Payment+Fiscal Device” fully compliant with the Law on Fiscalisation, which enables the acceptance of payment cards and instant payments, and can at the same time be used as a fiscal cash register.

The new integrated solution enables legal entities and entrepreneurs to save money, simplifies payments and makes them more efficient, considering that a single device is used to make a payment and issue a fiscal receipt in one transaction, while it is also possible to make payments with payment cards, or using instant payment. Clients are given additional flexibility via the option to install new apps on the device in the coming period.

“It is my great pleasure to be the first on the market to offer such an innovative and comprehensive solution to all our clients, and in this way contribute to an even better user experience in the small business segment, in which, statistically speaking, every fourth company is the client of Banca Intesa. This is another way in which, by creating a new solution, we enable both customers and merchants to make payments faster, without going to the cash register and waiting in line, and contribute to successful, simpler operations of businesses and merchants, we justify their trust and strengthen the mutual partnership, always striving to adjust the range of products and services according to their real needs,” said Željko Petrović, a member of the Executive Board of Banca Intesa.

In addition to further improvements to the package of services in the transaction banking services sphere, in the coming period, in addition to the recently expanded and improved credit line design for financing working capital and documentary products, we will continue to provide strong credit support to clients by improving the offer of working capital loans

with extended maturity, as well as investments. In line with our commitment to supporting the development of entrepreneurship, we expect to expand attractive credit support to women's entrepreneurship through the continuation of the Women in Business program, but also through specially designed products with longer deadlines and flexible security requirements for young entrepreneurs.
