

PRESS RELEASE

Road toll payment by credit cards

- Domestic and foreign drivers do not need cash at the main toll-gates in Serbia any more

Belgrade (10 September 2007) – Banca Intesa, “JP Putevi Srbije” and Pexim CardInfo, through their mutual project, enabled toll payment by payment cards on toll-gates in the country. Consequently, neither domestic nor foreign drivers need cash on the main toll-gates in Serbia any more. By introducing this new service, toll payment practice has been raised to a higher level in line with standards of the developed countries.

Considering that Banca Intesa is the only bank in the country to issue and accept payment cards of all the most represented international brands, this project enables toll payment by cards from the following programmes: MasterCard and Maestro, Visa, American Express as well by domestic Dina card. The possibility of toll payment by payment cards is available to all payment card holders, regardless whether issued by domestic or foreign banks. Toll may also be paid by business cards, and in order to speed up the procedure, users do not have to sign the POS receipt.

This facility is currently available to the drivers at the main toll-gates of the road network in Serbia, whereas in the course of September it will spread to the remaining parts of the motorway, which will encompass more than 100 toll-gates.
