

## PRESS RELEASE

Belgrade, 3 March 2009

### **Great interest for subsidized loans of Banca Intesa**

- Citizens submitted 320 requests, entrepreneurs 160, whereas with the corporate sector we are still negotiating about liquidity loans in total amount of EUR 260 million, of which EUR 50 million is already in the final stage of processing.

During the first week since Banca Intesa started to receive application forms for subsidized loans, citizens have submitted 320 requests in total, amounting to EUR 2 million, of which about 150 reaching the value of over one million euros have already been realized, whereas the remaining loans in the amount of one million euros are waiting to be realized.

When we talk about micro companies and entrepreneurs, the interest for loans with Government support is also extremely large, the proof of which is 160 submitted requests amounting to EUR 3.2 million, 88 of them in the amount of one and half million euros already having been realized.

There is also a great interest for subsidized loans in corporate sector (in the segment of middle size enterprises and large corporate subjects), and with clients from this segment of Economy we are currently negotiating on the approval of loans in the amount of EUR 260 million, of which 50 million are already in the final stage of processing and the first realizations can be expected by the end of the week. There has been a great interest in investment loans, but they are still in the stage of bringing the conditions into accord and negotiating with the clients.
